01 / ABOUT KRIPRA

Technology built around *how businesses operate.*

Kripra's Digital AI Private Limited develops enterprise software, AI-assisted platforms and industry-specific digital solutions designed to improve operational visibility, workflow efficiency and business scalability.

Our approach combines practical business understanding with modern software engineering to connect people, processes and data.

PEOPLE **PROCESSES** **DATA**

Connected digital operating layer

Business purpose

AI applied to practical operational needs.

Enterprise engineering

Architecture, integration and usability together.

Industry depth

Solutions shaped around sector workflows.

Modular growth

Systems designed to evolve with organizations.

Practical thinking. Thoughtful engineering.

02 / WHAT WE DO

Enterprise technology *from strategy to support.*

01

AI & automation

AI solutions, LLM-assisted workflows, integration, analytics, workflow automation and decision support.

02

Enterprise software

ERP, CRM, SaaS platforms, custom applications and industry-specific workflow systems.

03

Digital engineering

Web and mobile applications, UI/UX, API development and system integration.

04

Cloud & transformation

Cloud, DevOps, enterprise modernization, digital transformation and application management services.

TECHNOLOGY FOUNDATION

React / Next.js / TypeScript - Python / FastAPI / APIs
PostgreSQL - AI / LLM / Analytics - Cloud / DevOps

03 / OUR PORTFOLIO

Eight platforms.
Distinct business purposes.

JusticeAngel
Legal intelligence

Farmora
Agriculture technology

EDNORYX
Education intelligence

KriPra Smart ERP
Enterprise operations

StaffTract.AI
Recruitment & workforce

Pyrosk AI
Marketing & automation

Faturaix
Digital invoicing & compliance

Trade ERP / CRM
Commodity & trade operations

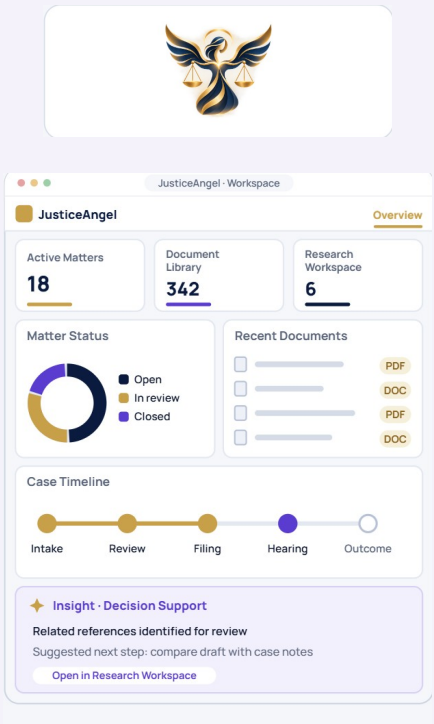

PRODUCT 01 / LEGAL INTELLIGENCE

JusticeAngel

IN DEVELOPMENT

Legal matters, documents and research in one structured workspace.

A legal workflow and intelligence platform concept designed around structured matters, documents, research and decision support.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

Legal matters

Organize matter information and related activity.

Document organization

Keep case documents in a structured workspace.

Research workflows

Coordinate references and research tasks.

Case intelligence

Bring relevant matter context together.

Structured insights

Support organized review of legal information.

Decision support

Present information for professional review.

TARGET USERS

Legal teams, legal professionals and organizations managing complex documentation.

BUSINESS VALUE

Structure, context and visibility across document-heavy legal work.

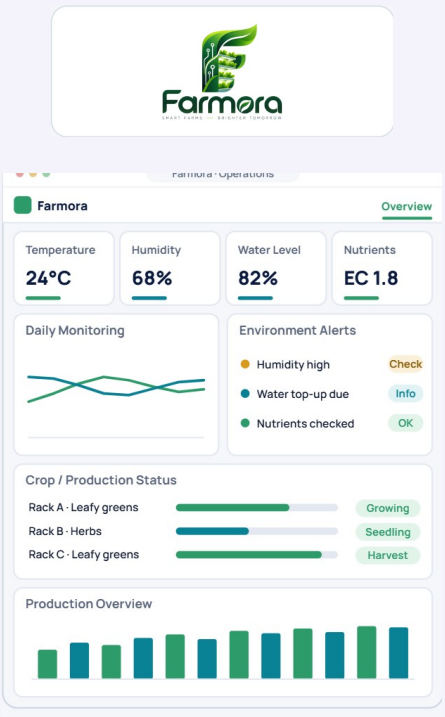

Intake > Review > Research > Case progress

PRODUCT 02 / AGRICULTURE TECHNOLOGY

Farmora

Operational visibility for controlled-environment agriculture.

Digital infrastructure for controlled-environment agriculture, production monitoring and operational management across hydroponics, aquaponics and sandponics.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

Environment monitoring

Bring environmental readings into view.

Production workflows

Organize crop and production activity.

Water tracking

Maintain water-related operational data.

Nutrient tracking

Track nutrient information and checks.

Operational records

Keep a structured production history.

Management intelligence

Review operations through shared dashboards.

TARGET USERS

Controlled agriculture operators, modern farms and structured production environments.

BUSINESS VALUE

Clearer management visibility across production data and operational activity.

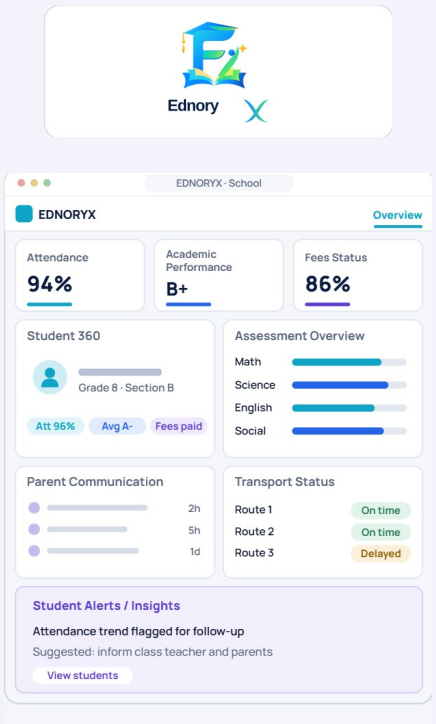

Monitor > Record > Review > Plan

PRODUCT 03 / EDUCATION INTELLIGENCE

EDNORYX

One connected platform for academic operations and student intelligence.

A connected education platform combining academic operations, student intelligence, parent engagement and campus workflows.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

Student 360

Bring student context into a unified view.

LMS & assessments

Support learning and assessment workflows.

Attendance

Track student attendance information.

Fees

Provide visibility into fee operations.

Parent communication

Connect families with school activity.

Campus & analytics

Transport visibility and academic insights.

TARGET USERS

Schools, multi-campus institutions, education networks and school management teams.

BUSINESS VALUE

A connected operational and intelligence layer for students, teachers, parents and management.

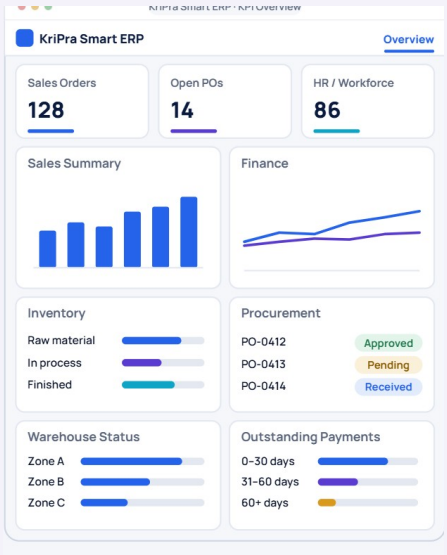

Academic activity > Student context > Shared insight

PRODUCT 04 / ENTERPRISE OPERATIONS

KriPra Smart ERP

Core business operations connected in one modular platform.

A modular enterprise platform designed to connect core business operations within one structured environment.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

CRM & sales

Coordinate customer and commercial activity.

Accounting & HRMS

Connect finance and people workflows.

Inventory

Maintain visibility into stock operations.

Procurement

Track purchasing activity and requests.

Warehouse

Organize warehouse operational workflows.

Manufacturing

Support production-related processes.

TARGET USERS

SMEs, multi-branch businesses, retail, services, trading and manufacturing organizations.

BUSINESS VALUE

Clearer cross-functional visibility and control through a connected operating layer.

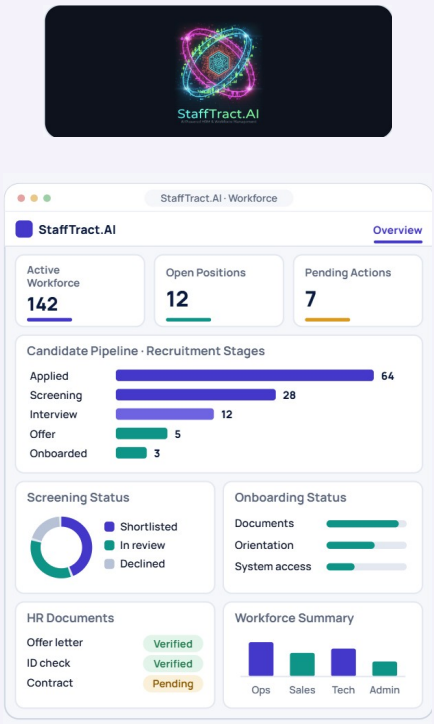

Commercial activity > Operations > Reporting

PRODUCT 05 / WORKFORCE & RECRUITMENT

StaffTract.AI

Recruitment, workforce coordination and HR operations in one view.

A workforce and recruitment platform supporting candidate intake and screening, HR documentation, workforce coordination and day-to-day HR operations.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

Recruitment workflows

Organize hiring stages and activity.

Candidate management

Maintain candidate information and context.

Candidate screening

Coordinate screening and review activity.

Workforce coordination

Support visibility across workforce operations.

HR documentation

Organize documents and related actions.

Operational tracking

Review workforce status and pending activity.

TARGET USERS

HR and recruitment teams, staffing companies and organizations coordinating workforce operations.

BUSINESS VALUE

A structured operational view across recruitment, workforce coordination and HR.

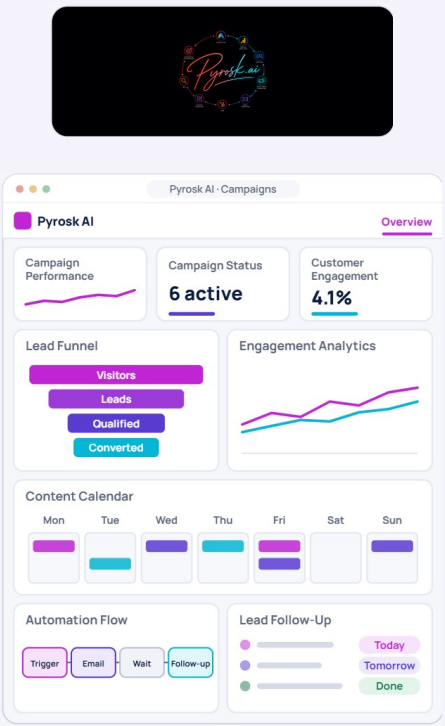

Intake > Screening > Interview > Onboarding

PRODUCT 06 / MARKETING & BUSINESS AUTOMATION

Pyrosk AI

Campaigns, leads and customer engagement in one workflow.

A marketing and engagement platform designed to support campaign execution, lead workflows and business automation.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

Campaign management

Coordinate campaign plans and execution.

Content workflows

Organize content activity and schedules.

Lead management

Maintain visibility across lead stages.

Customer engagement

Coordinate customer-facing activity.

Analytics

Review campaign and engagement information.

Marketing automation

Connect repeatable marketing workflow steps.

TARGET USERS

Growth teams, SMEs, service businesses and teams managing campaign and lead activity.

BUSINESS VALUE

Better coordination between marketing activity, leads and customer engagement.

Campaign > Engagement > Lead > Follow-up

PRODUCT 07 / DIGITAL COMPLIANCE & E-INVOICING

Faturaix

Structured invoicing and compliance workflows for document-driven operations.

A structured digital invoicing and compliance platform supporting invoice workflows, validation, reporting and document control.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

Digital invoicing

Organize digital invoice creation and handling.

Invoice validation

Support structured invoice checks.

Tax workflows

Coordinate tax-related invoice information.

Compliance operations

Organize compliance-related workflow steps.

Reporting

Review invoice and operational summaries.

Document control

Maintain invoices and related records.

TARGET USERS

Businesses requiring structured digital invoice and tax documentation workflows.

BUSINESS VALUE

Greater visibility and consistency across invoice and compliance operations.

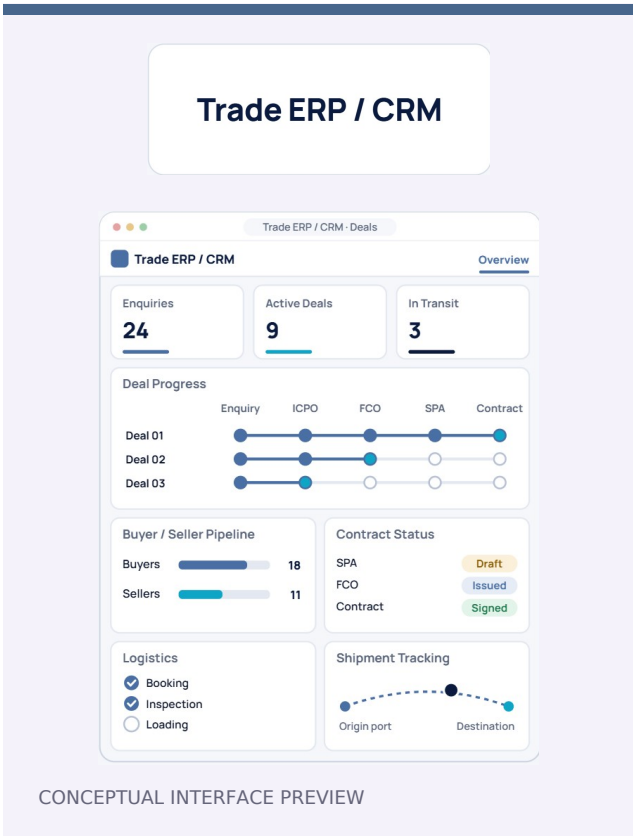

Draft > Validate > Approve > Report

PRODUCT 08 / COMMODITY & TRADE OPERATIONS

Trade ERP / CRM

Buyers, sellers, documents and logistics in one trade workflow.

A trade operations platform supporting buyer-seller coordination, commercial documentation, deal tracking and logistics visibility.

CONCEPTUAL INTERFACE PREVIEW

KEY CAPABILITIES

Buyer / seller CRM

Maintain commercial relationship context.

Enquiry tracking

Organize enquiries and deal progression.

ICPO & FCO

Coordinate key commercial documentation.

SPA & contracts

Maintain contract-related workflow records.

Logistics

Coordinate logistics-related activity.

Shipment visibility

Review shipment stages and progress.

TARGET USERS

Commodity traders and businesses managing multi-party commercial transactions.

BUSINESS VALUE

A structured operating workflow from enquiry through shipment visibility.

Enquiry > ICPO > FCO > SPA > Shipment

12 / HOW WE WORK

A clear path from *discovery to evolution.*

01

Discover

Understand business priorities, users and operational workflows.

02

Design

Define the solution, user experience and delivery scope.

03

Engineer

Build the software around agreed business requirements.

04

Integrate

Connect applications, data and existing systems.

05

Validate

Review functionality, permissions and rollout readiness.

06

Evolve

Support adoption, maintenance and future enhancements.

From understanding to execution.

LET'S BUILD

Intelligent systems. Thoughtful delivery.

Your vision. Our engineering.

Enterprise platforms. AI solutions. Industry-specific software.
Start a conversation about your next digital initiative.
